◉ Watch 55   ★ Star 246   ⑂ Fork 229

Install

TfT_02 edited this page on 13 Jun 2014 · 7 revisions

Welcome. This is a very brief installation guide for server administrators who want to know how to install mcMMO.

Step 1

Get Craftbukkit   RootFile (Step 1+)

Step 2

Grab the jar. Place it in your plugins folder like so:

Step 3

Start your server. That's it. Seriously.

Optional:

Permissions

We highly recommend a permissions plugin. Here is a list of a few permission plugins:

- PermissionsBukkit
- bPerms
- GroupManager
- Privileges

1. DeclareVariables for Selection
2. RootFile

If you want to know how to setup permissions with mcMMO, click here.

Configuration

Once you have mcMMO installed, you might want to configure the plugin to your likings. There are several config files which enable you to do so. The Configuration guide has information about setting these config files up.
