Open Flash Chart II Plugin for Ruby on Rails - Graphs (OFC 2)

Sample Use

Download the sample OFC2 project.

1. rails testing_ofc_2   **rootfile**
2. cd testing_ofc_2
3. script/plugin install git://github.com/pullmonkey/open_flash_chart.git
4. If the above line did not work for you, you can also use http -
   script/plugin install http://github.com/pullmonkey/open_flash_chart.git
5. script/generate controller test_it
6. Add the following to the test_it_controller.rb in RAILS_ROOT/app/controllers:

insertintofile

```
 1
 2  class TestItController < ApplicationController
 3    def index
 4      @graph = open_flash_chart_object(600,300,"/test_it/graph_code")
 5    end
 6
 7    def graph_code
 8      title = Title.new("MY TITLE")
 9      bar = BarGlass.new
10      bar.set_values([1,2,3,4,5,6,7,8,9])
11      chart = OpenFlashChart.new
12      chart.set_title(title)
13      chart.add_element(bar)
14      render :text => chart.to_s
15    end
16 end
17
```

7. Add the following to index.html.erb in RAILS_ROOT/app/views/test_it/:

insertintofile

```
1
2 <script type="text/javascript" src="/javascripts/swfobject.js"></script>
3 <%= @graph %>
4
5
```

8. Copy swfobject.js from the plugin's assets/ directory (will make this happen at install time later) to your RAILS_ROOT/public/javascripts directory
9. Copy open-flash-chart.swf from the plugin's assets/ director to your RAILS_ROOT/public/ directory
10. script/server
11. Browse to http://localhost:3000/test_it   **rootfile**
12. Let me know how it goes, thanks.
